Allowable Subject Matter

1. Claims 1-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Moore (US 4,825,223) discloses a reflective assembly comprising a first reflective surface; a plurality of reflective surfaces positioned successively adjacent the first reflective surface, each reflective surface having a focal point and focal length relative to the first reflective surface. Moore, however, fails to specifically teach that wherein one or more of the reflective surfaces are translated about one or more common axes, resulting in an offset of the focal point of one or more of the reflective surfaces relative to that of the first reflective surface.

Claims 2-18 are allowed for depending on claim 1.

Regarding claim 19, Moore teaches a reflective assembly comprising a first reflective surface; a plurality of reflective surfaces positioned successively adjacent the first reflective surface, wherein each reflective surface is configured to reflect incident radiation in-phase such that microwave signals reflected by each reflective surface arrive at a common focal point in-phase. Moore, however, fails to specifically teach that each of the reflective surface reflecting an incoming signal to a plurality of specified focal points in-phase.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
